TECH BULLETIN NUMBER 0143
 PCR 121807
 SUBJECT ME-RC V2.1
 MODELS AFFECTED ME-RC, ME-RC50, ME-RC60
 WARRANTY Not Applicable

Change Description		
Was:	Is:	Implication:
Remote revision	Remote revision	
rev2.0	rev2.1	
No communication from the inverter would display "Charger Standby" or "Off".	If there's no communication the top line of the LCD now displays "No Inverter Comm".	More clearly communicates the issue to the user.
LBCO displayed voltage range based on the DC voltage input.	On power-up, LBCO Voltage range selection is based on the model number. If the model isn't recognized, the LBCO voltage range is based on the DC input voltage.	LBCO range information is selected with the most appropriate information.

<p>An active ME-PT2 input (two-wire closure) looks like an 85°F input.</p> <p>If the AGS Start Temp is set to 90°F this setting will not start the generator.</p>	<p>Add setting in AGS temp menu: "Start=Ext Input".</p>	<p>An Active PT2 input will only start the generator when "Start=Ext Input" is selected in the Temp Start Menu.</p>
<p>No CUSTOM battery profile.</p>	<p>Added CUSTOM battery profile.</p>	<p>User can set custom Absorption and Float values.</p>
