TECH BULLETIN NUMBER: 0112

DATE: October 13, 2004

Subject: ME-AGS for Westerbeke generators

Models affected: new product

ME-AGS-W is now available for use with Westerbeke generators. The ME-AGS-W adds one relay to the circuit board making use of terminals 1&8. Terminals 1&8 are used for the bypass function required during starting of a Westerbeke generator.

Order part number ME-AGS-W for the Network version (used w/Magnum Inverter) or order part number ME-AGS-W-S for the stand alone versions.
